ABOUT ME

Final-year MCA student with practical Spring Boot and Java development experience from a 6-month internship at NJ Group. Built backend systems, worked with REST APIs, and delivered a GRC incident management platform. Ready for a full-time junior developer role.

PROJECTS

IMS GRC SYSTEM

2025 - 2026

Nj Group / MCA Final Year

Description

The Incident Management System (IMS) aims to systematically capture, classify, assess, investigate, resolve, and report incidents that impact Governance, Risk, and Compliance (GRC) obligations of an organization. The system ensures accountability, traceability, regulatory compliance, and continuous improvement through structured incident handling.

Technologies/Tools Used

- Springboot
- Java Programming
- BCrypt Encryption
- Postman API Tester
- HTML CSS JS Bootstrap
- MySql

ACCOUNTING SOFTWARE

2023 - 2024

Client Global Computers / BCA Final Year

Description

Developed a comprehensive account management system for a financial services company to streamline customer account management, improve data accuracy, and enhance user experience.

Responsibilities

- Designed & developed application from start to end.
- Implemented core modules and database integration
- Performed coding and basic testing to ensure proper functionality.

Technologies/Tools Used

- C#, .NET framework, MsSQL.
